BELT SERVICE — THE ACT WAY

100% Service. Zero Compromise.

The ACT Group
Environmental Services Division

BULK MATERIAL HANDLING · SINCE 1991

ADVANTAGES OF ACT SERVICE

Most belt companies only splice. We get the belt turning.

When you ask for a belt to be spliced, you want it done right the first time — and you want the conveyor running when we leave. Our crews arrive with the equipment, the fasteners and the belt already on the truck, so the job does not stop while somebody drives back for parts.

Our Fontana, California warehouse carries more than **20,000 feet** of the most common belting in the industry — 24-plus rolls — along with mechanical fasteners of every type. We vulcanize 18" through 60" in our 18,000 sq/ft fabrication facility or in your plant. We supply Spectrum™ Belting for every belt need.

> ***ACT's crew went above and beyond to get our belt running properly. Their knowledgeable service technicians were professional, and ready to work from the moment they arrived.***

Services & Products

- Heavy & light weight belt service
- Finger splicing
- Full line of domestic & import belt
- Full line of mechanical fasteners
- Belt rolling & disposal
- Cold-bond vulcanization
- **18"–60" vulcanization capable**

Splicing Done Right

Every splice includes the following — no questions asked, no line items added after the fact.

- Belt removal and install
- Removal of idlers or other equipment required to splice
- Mechanical and vulcanized splices
- Tracking of the belt*

*Belt tracking is assessed during the bidding phase. Extensive tracking is T&M, or quoted prior to arrival.

20,000 ft	18"–60"	24/7	1991
CONVEYOR BELTING IN STOCK	VULCANIZING CAPABILITY	EMERGENCY FIELD RESPONSE	IN BUSINESS SINCE

Tell us the plant, the belt and the problem.

You will get a real person — not a ticket number. Crews dispatched across California, Nevada, Oregon and Washington. OSHA 30 and MSHA Part 46/48 trained. CA Lic. #700731 (Class B) · NV Lic. #0072789 (A14/A20).
