SILO, BIN & BUNKER CLEANING

Increase silo efficiency. Safely.

The ACT Group
Environmental Services Division

BULK MATERIAL HANDLING · SINCE 1991

ADVANTAGES OF ACT SERVICE

Nobody has to climb into the silo.

A plugged or slow-draining silo costs you money every hour it sits. We have been cleaning them since **1991**. Our Silo Cleaning Whip works the buildup down from above, so the equipment sits safely on top of the silo and the crew stays out of it — **no confined space entry***.

Before we quote, we evaluate the silo: material, buildup, roof openings, dust collection and access. That is how the job gets priced right and finished in one trip. We also run scheduled maintenance cleaning and supply flow aid products, so the silo stops plugging in the first place.

> ***The ACT Group helped us clear a silo that had been plugged for 18 years, all without confined space entry.***
>
> IGM

Safety First — always included

Every silo cleaning quote includes the following. No line items added after the fact.

- Comprehensive evaluation of silo conditions during the proposal process
- Factory trained technicians
- Explosion-proof lighting for safe visibility
- **OSHA 30 and MSHA Part 46/48 trained**
- Strategic cleaning to maximize flow and production

*On occasion confined space entry is required. That is determined during the proposal process, never sprung on you in the field.

The Silo Cleaning Whip

Lowered through a roof opening and worked from the deck. It breaks down rathole, bridging and wall buildup without putting a person inside the vessel — and without cutting into the silo.

Silo Cleaning Whip

KEEP IT FROM PLUGGING AGAIN

Cleaning is the fix. These stop it coming back.

Flash Cannon

ACT's own air cannon. Timed blasts of compressed air knock buildup off the wall before it bridges. G400 models, 5-year warranty.

Vib-Slide

Vibrating discharge for hoppers and bins that will not draw down. Keeps material moving at the outlet instead of arching over it.

Flow Aid Products

Liners, release agents and dust suppression matched to your material, so wet or sticky feed stops sticking to the wall.

Zero	1991	24/7	CA · NV · OR · WA
CONFINED SPACE ENTRY*	IN BUSINESS SINCE	EMERGENCY FIELD RESPONSE	CREWS DISPATCHED

Tell us the plant, the silo and the problem.

You will get a real person — not a ticket number. Ask about scheduled maintenance cleaning, flow aid products and air cannons to keep it from plugging again. CA Lic. #700731 (Class B) · NV Lic. #0072789 (A14/A20).
